### **mission 7: present**

Give a 15 minute presentation on your observation, interview and commentary.

#### **Presentations: Monday December 4th, 2006: 1:30-5:30 pm.**

The goal of this presentation is for you to figure out a way to clearly present an *overview* of all of the material you collected during the semester in a structured and easy-to-understand way for audience members who will not have seen anything prior. The presentation can be a paper you read, or PowerPoint, or a poster, or a diagram—but it must be a clear overview. And it must be 20 minutes or less (please time yourself).

You will present on panels with those who wrote commentary on your project.
